Technical Skills

Languages: Java, Python, JavaScript, C#, SQL, HTML, CSS

Frameworks & Tools: React, .NET Core, ASP.NET, Entity Framework, JSwing, Pygame, REST APIs, Azure (Service Bus, SQL Server), Git, Jira, Postman, UML, Angular

Operations & Technical Strengths: Full-Stack Development, API Design & Integration, Cloud Computing, Agile Practices, Process Automation & Workflow Optimization, Database Architecture, Technical Documentation, AI-assisted Development & Code Automation

AI Tools & Agents: Claude, ChatGPT, GitHub Copilot, Cursor, prompt engineering, agentic workflow design

Data & Automation: Python scripting, Microsoft Power BI, SQL querying, data pipeline development, process automation, Tableau

Education University of Toronto, St. George

BSc Cognitive Science & Computer Science & Math — University of Toronto (St. George)

Graduated: Spring 2026

Relevant Coursework:

Cognitive Science: Psychology of Decision-Making, Human-Computer Interaction, Learning & Memory, Cognitive Neuroscience, Cognitive Computing

Systems & Interpersonal: Social Psychology, Communication, Group Dynamics, Research Methods & Statistics

Computing: Data Structures, Software Engineering, Web Development, Database Management

Experience

Full Stack Developer | Contract Position

April 2025 – September 2025

- Managed workflow-based processes for importing, validating, and logging Excel-driven operational data, ensuring accuracy and timely resolution of issues.
- Monitored exceptions, investigated system and data issues, and improved error visibility through real-time reporting and tracking in Azure.
- Coordinated backend workflow reliability across .NET Core, Angular, SQL Server, and Azure Service Bus components, supporting smooth execution under deadlines.
- Used AI-assisted tools including GitHub Copilot to work faster, improve output quality, and streamline problem solving across multiple technical workstreams.
- Maintained clear technical documentation and structured database logic to support consistency, traceability, and operational efficiency.

Full Stack Developer | PTSI.ca (Startup Project)

January 2025 – April 2026

- Owned end-to-end execution of website and lead-generation workflows, balancing multiple priorities in a fast-moving startup environment.
- Identified and resolved issues across frontend and backend systems, ensuring responsive user experience and reliable workflow completion.

- Adapted quickly to evolving requirements and helped improve processes as business needs changed, contributing to scalable operations.
- Used AI-assisted development tools to increase speed, improve quality, and support more efficient execution across daily tasks.
- Collaborated across functions to deliver updates, maintain momentum, and support business-facing outcomes.

Math Tutor (Forest Hill Tutoring) | Toronto, ON

January 2024 – April 2026

- Delivered tailored instruction in calculus, vectors, statistics, and advanced functions, boosting student test scores by 30% on average.

Projects

Canadian University Program Finder | mycanadianuni.ca

- Engineered a React-based educational platform for discovering Canadian university programs with dynamic filters implemented in JavaScript and styled components.

Meta Learning Program Developer | University of Toronto

September 2023 – December 2023

- Developed a Java-based study aid inspired by cognitive science, integrating SQL Server for data persistence and using Git for version control.

Roadmap Optimization | University of Toronto,

December 2022 – March 2023

- Developed a Python application applying Dijkstra's algorithm and graph theory for traffic flow analysis, reducing congestion in simulations by 25%. **Aim Trainer Game | Python Project**

September 2021 – December 2021

- Created an interactive game to enhance reaction speeds, implementing core game logic and event handling in Python.

Employee Management System | Java Project

September 2020 – December 2020

- Built an employee management tool combining Java GUI (JSwing) and SQL Server backend for salary and employment type tracking.

Extracurriculars & Awards

University of Toronto Men's Golf Team Captain

- Led the team to 3 regional championships.
- Honored with the Arnold Palmer Award (2023) and awarded \$2,000 for top performance.

Volunteer, Little Aces Tennis Program

- Supported wheelchair tennis athletes for 10+ years, contributing to sports accessibility and inclusion.
